

What a Rose Means- The Flower Vocabularies

If you have a special message or want one, then use your stem roses or petals to say it. This is especially if you just don't know what to say, have a lot to say-so mix them- or especially if...you want to say it secretly. Choose your favorite rose colors or the traditional rose meaning or both and have fun.

Dark Red I love you with passion

White Secretly united in love.

Pink You are lovely. A gentle beauty.

Peach Your qualities and charms are unequalled

Yellow The highest friendship orforgive and forget

Green You are fresh and lively or....strength

Orange You are an accomplished beauty or...handsome

Lavender You are a dignified rarity

If you mix a miniature, garden spray rose of any color; add "beauty and youth" to the meaning.
